PORTFOLIO COMMENT - MORTEN E. ASTRUP (CHIEF INVESTMENT OFFICER)

Dear investor,

Storm Bond Fund was up 0.4% in April and up 1.5% YTD.

After a period with volatility and negative performance equity markets improved during April due to Q1 earnings beating expectations so far and fairly robust GDP figures coming out of the US and China in particular. The US 10 year government yield moved higher during the month touching 3% consequently impacting longer dated fixed rate bonds negatively. The Nordic High Yield market has performed well on a relative basis with small but positive returns during the month.

Oil prices increased by -7% during April largely due to the continued strength in global oil demand, lower inventories as a result of OPEC production cuts and somewhat increased geopolitical unrest due to prospects of sanctions on Iran. The OSX index (Oil Service Index) which has lagged oil prices significantly in Q1/18 finally turned during April resulting in +-15% MoM performance on the back of higher oil prices and improved outlook for increased oil service activity. Our position in Gulfmark was positively impacted by +19.0% during the month due to the aforementioned positive sentiment shift and improved earnings outlook for the PSV market during the coming summer season. We believe Gulfmark stands out as an interesting play on offshore recovery due to the very attractive implied vessel valuation, strong balance sheet with a solid liquidity position and the fact that it is an obvious M&A target in a consolidating market. Hence, we see strong risk/reward characteristics going into H2/18.

Our position in Lebara remained under pressure during the month due to continued speculation in the financial press concerning their ability to report audited figures and the lack of a new CFO taking bond pricing down to mid-60s. Per end-April, the Company did not meet the deadline for delivery of the audited 2017-report, due to timing and capacity constrains according to the company. The company has a grace period of 20 business days and the report will thus need to be published during May. This was clearly a negative event. However, it was to some extent overshadowed by the statement saying that the Company aim to come to an agreement with bondholders on the conditions for an early redemption of the bond and will summon to a bondholders meeting over the coming months. Although we lack additional information about financing and pricing this should be supportive for the bond price. Additionally, the Company announced that Olivier Sage has been hired as the new CFO and will begin in mid-May. We continue to monitor the situation closely.

With only one year's weighted interest rate duration and less than three years to maturity we continue to take a minimum of interest and duration risk on a portfolio level. With higher credit spreads in the Nordic region compared to the rest of Europe combined with continued recovery in the oil sector we are positive on a relative and absolute basis to our region going forward.

BOND PORTFOLIO - TOP 20

NAME	ISIN	PRICE	YIELD %	NAV %	SHORT DESCRIPTION
1 Veritas Petroleum Services B.V. 14-1N00010708506		98,00	9,5 %	5,8 %	VPS is the global market leader in Fuel Quality Testing, having an estimated global market share of ~50%. The Company was previously owned by Det Norske Veritas before it was sold to the private equity company IK Investment Partners. The client base consist of ~900 companies with more than 9,000 vessels, meaning a high degree of diversification. The bond is secured and by end-2017 NIBD/EBITDA was reported at 4.0x, which provides bondholders with good valuation support.
2 GasLog Ltd 16-21 FRN	N00010767858	107,15	5,5 %	4,5 %	Gaslog is an international owner and operator of LNG carriers listed at NYC stock exchange with a market cap of USD 1.35bn (+MLP Gaslog Partners mcap at USD ~1.0bn). The Company is benefitting from the improving LNG spot rates and has a strong MLP entity which has contributed with USD ~270m in 2017. This has resulted in a very strong liquidity position of USD 385m per end-Q4/17. Despite the somewhat high leverage, we find the 2022 bonds to offer solid risk/reward due to the strong backlog, solid balance sheet and improving LNG market.
3 Golar LNG Partners LP 17-21 FRN	N00010786056	101,35	8,1 %	4,3 %	Golar LNG Partners is an international owner of LNG and FSRU tonnage listed at the NYC stock exchange with a market cap of USD 1.43bn. The GMLP bonds remains the widest in the LNG peer group despite improving LNG market outlook due to the perceived risk of the Hili project. The Company has a very solid liquidity position and the lowest leverage in the LNG peer group. Hence, we view the GMLP credit to offer very attractive risk/reward.
4 Jacktel A/S 14-19	N00010714561	100,68	6,6 %	4,1 %	1st lien pledge in a jack-up built for the Norwegian continental shelf. Won a contract on Johan Sverdrup in November 2015 with STL that secures work until 2020. We expect the company to obtain other sources of funding before maturity of the bond.
5 MPC Container Ships Invest B.V. 17-2N00010805872		101,25	6,8 %	4,0 %	Pure play container shipping company. USD 425m in equity raised, listed on the Oslo Stock Exchange with an mcap of NOK 3.8bn. Senior secured bond with 1st priority in the fleet. Bond with significant downside protection with LTV of ~45% on historical low valuations. Estimated loan to scrap ratio of ~110%.
6 DNO ASA 15-20	N00010740392	103,06	7,3 %	3,9 %	DNO is a Middle East and North Africa focused oil and gas company listed on the Oslo Stock Exchange with a market cap of NOK ~16.5bn. Although the Company is operating in regions with political risk the credit benefits from low lifting cost, a strong balance sheet and now more regular and stable cash flows from the authorities (KRG).DNO has recently acquired a significant position in Faroe Petroleum
7 Bonheur Asa 14-21 FRN	N00010714538	99,88	4,7 %	3,7 %	Fred. Olsen controlled conglomerate listed on the Oslo Stock Exchange with a market cap of NOK 4.6bn. Bonheur has investments within shipping, offshore, renewable energy and cruise. By end-Q4/17 the liquidity stood at NOK 3.6bn and NIBD/EBITDA LTM of 2.4x.
8 VIEO B.V. 17-22 FRN	N00010804198	64,75	18,6 %	3,3 %	Lebara is one of Europe's fastest growing mobile companies with ~3.5m active users. The management and owners have identified several measures to grow the business, improve cost-base and increase profitability. Hence, the EBITDA and cash flow is expected to improve over the coming years which supports the credit case. The bond pricing has been under pressure the last month due to concerns on covenant breach. The Company has recently reported satisfactory quarterly figures and we are expecting further actions being made by the company addressing key concerns shortly.
9 Western Bulk Chartering AS 13-19 FRN00010675572		102,40	7,3 %	3,2 %	Western Bulk Chartering is a global dry bulk operator with a trading oriented business model, focusing on the Supramax and large Handysize segment. The Company is listed on the Norwegian OTC list and is 74% owned by Kistefos. We view the credit as strong with limited refinancing risk due to i) strong support from main shareholders whom has contributed with NOK ~350m of equity since 2016, ii) strong balance sheet with a net cash position and iii) improving market fundamentals.
10 Okea AS 17-20	N00010810062	100,48	7,4 %	3,2 %	Okea is an independent E&P company focused on small field developments on the NCS. The interesting feature of this bond is the unique Norwegian petroleum tax system. From a credit perspective, the tax system offers significant downside protection of at least 78% and up to ~95% of invested capital that are tax deductible over 4-6 years. Furthermore, the cash shield is transferrable to other companies and also refundable by the Kingdom of Norway upon discontinuation of operations. On the back of this, we find the credit profile in Okea to be very strong and the bond debt is expected to be covered by escrowed cash and the underlying tax claim even in a scenario with lower oil prices.
11 VV Holding AS 14-19 144A FRN	N00010714033	101,25	5,3 %	2,8 %	VV Holding (Norsk Gjenvinning) is a Norwegian recycling business and recently announced that Summa Private Equity is acquiring the company from Altor Private Equity. According to market participants the transaction is done at EV/EBITDA ~10x, which implies an secured LTV of ~55%. The deal is backstopped by banks and we expect the bonds to be called in H2/18.
12 Host Property AB 16-19 FRN	SE0009357676	101,25	5,2 %	2,7 %	1st lien pledge in 8 hotel properties in Sweden with a total value of SEK 680m. Prime locations in their respective regional cities. Gross LTV of approx. 50% and average lease maturity of 13 years.
13 Beerenberg Holdco II AS 17-21 FRN	N00010786296	104,06	6,0 %	2,7 %	Leading supplier of ISS services in the North Sea, which is one of the largest MMO markets. Strong and long-term relationships with blue-chip companies. Solid earnings visibility and flexible cost base. Net leverage came in at 2.6x (incl. Bouvet) for FY'17 which is considered is moderate and expected to come down over the coming years, with the company having a strong de-leveraging capacity and a NOK 10.5bn backlog providing comfort
14 Hospitality Invest AS 17-22 FRN	N00010808835	99,50	7,2 %	2,6 %	Hospitality Invest is a privately-owned investment company and the company invests across a variety of sectors, with a special focus on social services such as preschools and social infrastructure in the Nordic region. The credit profile is deemed to be strong with solid asset backing (~35% LTV) and solid diversification prospects.
15 Euronav Luxembourg S.A. 17-22	N00010793888	101,13	7,3 %	2,6 %	Largest publicly listed tanker company in the world with a market cap of USD ~1.1bn. Conservative financial strategy with target to keep a minimum of 2 year operational liquidity runway. Recently announced that they will acquire Gener8 Maritime with shares increasing its fleet from 51 to 81 vessels.
16 BW Offshore Ltd. 12-20 FRN	N00010638075	100,01	5,6 %	2,5 %	BW Offshore is a Norwegian FPSO company listed on the Oslo Stock Exchange with a mcap of NOK ~6.7bn. We find the BWO bonds attractive with the bonds trading at spreads in the excess of 500bps. We expect the credit metrics to improve significantly ahead with NIBD/EBITDA below 3.0x for 2018 paired with a solid liquidity due to the recently announced USD 275m preference share issue with ICBC.
17 Kistefos AS 16-19 FRN	N00010779291	105,13	5,3 %	2,5 %	Norwegian investment company, which is 100% owned by Christen Sveeas. Kistefos holds investments within financial services, Telecom & IT, commercial real estate, offshore services and other financial investments. The value adjusted equity per end-H1/17 is estimated to be NOK 4.3bn, which suggests solid asset backing for the outstanding bonds.
18 Borgestad ASA 18-21 FRN	N00010720766	99,75	8,8 %	2,4 %	Borgestad was listed in 1917, making it the oldest company on the Oslo Stock Exchange. Today the company is focused on mainly real estate investments in Poland and Norway as well as production, distribution and installation of refractory products. Even though the credit metrics is only deemed adequate, we find solid valuation support in the pledged assets with 75% LTV in our bear case which we believe is sufficient to either refinance the bonds at maturity or sell assets to cover debt obligations.
19 DOF Subsea AS 17-22	N00010788177	95,18	11,4 %	2,4 %	Provider of subsea tonnage, subsea construction and IMR services. 51% owned by DOF ASA and 49% owned by First Reserve. Strong order backlog of NOK ~18bn (NOK 37bn inc options) with tier-1 counterparties. The firm EBITDA backlog is estimated to cover net debt and remaining capex.
20 IGas Energy PLC 13-21	N00010673791	100,41	8,0 %	2,3 %	London-listed company producing oil and gas onshore UK. Stable production of ~2,600boepd at an operating cost of USD ~30/boe. The Company has recently been restructured with bondholders receiving a mix of cash, stocks and a new bond, taking NIBD to USD ~10m. This combined with security of all assets and improved lifting costs minimizes risk of refinancing at maturity. The new equity investor is Kerrogon private equity, while the largest bondholder was KKR.
