From inception (September 2008) to end of 2009, the fund was EUR-denominated (unhedged). *From January 2010, performance and NAV are reported based on the EC share class, EUR-denominated (hedged). **From 1 Jan 2012, the fund has been a hedged NOK-denominated fund. ***From March 2012, performance and NAV are reported based on the EC NOK share class, EC changed name to RC NOK as of January 2013. Past performance is no guarantee for future performance.

COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund was up 0.9% in February and is up 1.9% YTD.

The positive market sentiment continued in February resulting in solid returns for both equity and fixed income markets on the back of the implementation of Chinese stimulus, dovish US Fed policy and most importantly constructive US/China trade talks. By end-February, US and European stock markets gained more than ~10% while as the Chinese market measured by the Shanghai index gained nearly 18% in local currency. US and European high yield markets continued its strong performance YTD yielding 1.6% and 2.1% respectively during the month. Brent oil prices moved 6.7% higher during the month due to lower production from Saudi Arabia, further decline in Venezuela and lower US inventory levels. The increase in oil prices month over month had limited effect on oil related equities with the Philadelphia Oil Service Index trading down nearly 3% but a modest positive impact on US Energy high yield which traded 1% higher.

The Nordic High Yield market, which experienced less volatility in Q4/18 compared to the US and European High Yield market, continued its positive development during the month with our peer group yielding on average +0.75% vs. Storm Bond Fund at +0.9%. After a period with somewhat improved credit margins in the secondary market combined with limited supply of new issues we expect that the activity in the primary market will pick up going into Q2/19. By end-February the majority of our portfolio companies have reported 4th quarter earnings accounts without any significant deviations from our expectations.

While as US and European high yield have rallied past previous peak and is now back at all time low spreads the Nordic High Yield market is still trading above historical averages with both significantly lower credit and modified duration. We continue to argue that being exposed to a concentrated but well diversified portfolio of solid Nordic High Yield credits with short credit duration (2.4 years) and low modified duration (1.3 years) going forward remains as an attractive investment proposition. The yield to maturity in the portfolio is 7.8%.

BOND PORTFOLIO - TOP 20

NAME	ISIN	PRICE	YIELD %	NAV %	SHORT DESCRIPTION
1 VV Holding AS 14-19 144A FRN	NO0010714033	100,45	5,3 %	4,3 %	Norsk Gjenvinning is Norway's largest waste management company with a market share of ~25%, which is around 4x the closest peer in terms of revenue. VVH benefits from having a diversified customer base with low churn and a high share of recurring customers. Adjusted for operating leases, we estimate leverage of ~5.2x. The Company was acquired last year by Summa PE from Altor PE, with an estimated acquisition price of NOK ~4bn vs. bond at that time of NOK 2.2bn.
2 Golar LNG Partners LP DL-FLR Notes	NO0010786056	100,27	8,7 %	4,1 %	Golar LNG Partners is an international owner of LNG and FSRU tonnage listed at the NYC stock exchange with a market cap of USD 850m. The credit benefits from USD 2.4m in firm backlog, a strong LNGC market, solid liquidity prospects and moderate financial gearing of 5.0x NIBD/EBITDA. Further MLP dropdowns and FSRU contract awards would further improve the credit story.
3 American Tanker Inc. 17-22 -144A-	NO0010777519	99,55	9,7 %	3,6 %	American Shipping company owns 10x modern US Jones Act Tankers. The Company is listed on the Oslo Stock Exchange with an mcap of NOK 2bn. All vessels chartered out on bareboat contracts to OSG. These rates are sufficient to cover debt service and dividends. The counterpart risk in OSG is reduced through improved market fundamentals and newly refinanced balance sheet. Strong financial sponsor in Aker ASA.
4 Euronav Luxembourg S.A. 17-22	NO0010793888	97,78	8,5 %	3,4 %	Largest publicly listed tanker company in the world with a market cap of EUR 1.6bn. Conservative financial strategy with target to keep a minimum of 2 year operational liquidity runway. Recently acquired Gener8 Maritime with shares increasing its fleet from 51 to 81 vessels.
5 Songa Container AS 18/21	NO0010837248	100,33	8,5 %	3,3 %	Songa Container AS was established in 2017 and is an asset play focusing on the recovery of the container feeder market. The Company has acquired a fleet of 15 feeder vessels with an average age of 9 years, with sizes ranging from 1,000 TEU -5,000 TEU. All of the vessels will be fitted with scrubbers within IMO2020. The fleet is cash flow positive at current rates and gross loan to value including the scrubber investment is estimated to be ~55%. The Company is backed by experienced ship-owner Arne Blystad which is deemed to be a strong sponsor. The bond is senior secured.
6 Hoegh LNG Holding Ltd. 15-20 FRN	NO0010739683	100,83	6,9 %	3,3 %	HLNG is an owner and operator of floating storage and regasification units and has a leading position within this market. The Company is listed on the Oslo Stock Exchange with a market cap of NOK 3bn. The main owner Leif Höegh & Co owns ~40% of the Company. The majority of the fleet is on long-term contracts with solid counterparts providing the company with solid cash flow visibility going forward. We believe the '2020 bonds offers strong risk/reward as we see limited risk of liquidity shortfall ahead of the bond maturity.
7 Kistefos AS 17-21 FRN	NO0010809700	103,25	6,0 %	3,3 %	Norwegian investment company, which is 100% owned by Christen Sveeas. Kistefos holds investments within financial services, Telecom & IT, commercial real estate, offshore services and other financial investments. Viking Supply ships made an impressive sale of vessels last year and they recently announced a special dividend to its shareholders. With NOK ~600m in cash on balance and NOK ~900m in cash inflow from Viking Supply Ships, Kistefos will now have around NOK 1,500m in cash on balance.
8 GasLog Ltd 16-21 FRN	NO0010767858	105,00	5,8 %	2,9 %	Gaslog is an international owner and operator of LNG carriers listed at NYC stock exchange with a market cap of USD 1.362bn (gaslog partners: USD 1bn). The Company is benefitting from the improving LNG spot rates and has a strong MLP entity which has contributed with USD ~270m in 2017. This has resulted in a very strong liquidity position of USD ~400m per end-Q3/18. Despite the somewhat high leverage, we find the 2021 bonds to offer solid risk/reward due to the strong backlog, solid balance sheet and improving LNG market.
9 DNO ASA 2020	NO0010740392	102,52	6,8 %	2,8 %	DNO is an oil and gas company listed on the Oslo Stock Exchange with a market cap of NOK 20bn. Although the Company is operating in regions with political risk the credit benefits from low lifting cost, a strong balance sheet and now more regular and stable cash flows from the authorities (KRG). Per end-Q3/18 the cash position was reported at USD 640m vs. outstanding 2020 bond of USD 200m. DNO has made a bid on the remaining shares in Faroe, the transaction would in our view improve the overall risk profile.
10 Jacktel A.S. 18/23	NO0010836778	96,25	11,5 %	2,8 %	1st lien pledge in a jack-up built for the Norwegian continental shelf. Currently working for Statoil on the Johan Sverdrup field until 2020 with further options thereafter. The Company has recently refinanced its secured notes maturing next year.
11 MPC Container Ships Invest B.V. 17-21	NO0010805872	100,59	7,2 %	2,7 %	Pure play container shipping company. Close to USD 500m in equity raised, listed on the Oslo Stock Exchange with an mcap of NOK 2.5bn. Senior secured bond with 1st priority in the fleet. Bond with significant downside protection with LTV of ~50% on historical low valuations. Estimated loan to scrap ratio of ~120%.
12 Stena Ab 14-24	USW8758PAK22	94,00	8,5 %	2,6 %	Swedish conglomerate which is 100% controlled by Sten Olsson family. Stena is peaking leverage wise by end-18 and is expected to deleveraging the balance sheet going forward through debt amortization and improved earnings particularly from the drilling and tanker segment. Stena has a strong liquidity position which was reported at SEK 20bn by end Q3/18. Based on our estimates we see substantial equity cushions for bondholders. Stena has a B+ rating by S&P
13 Siccar Point Energy Bonds PLC DL-Not	NO0010815053	101,58	8,7 %	2,6 %	Siccar Point holds stakes in some of the largest oilfields in the UK sector. The company has significant production today with very long production profiles. The operating cash flow is deemed to be very solid due to low lifting cost and limited tax payables due to inherited tax losses. The company is well capitalized with an estimated LTV of ~35% based on 60/bbl oil price. The company has solid equity sponsors in Blackstone and BlueWater Energy.
14 Bonheur Asa 14-21 FRN	NO0010714538	101,38	4,2 %	2,4 %	Fred. Olsen controlled conglomerate listed on the Oslo Stock Exchange with a market cap of NOK 5.1bn. Bonheur has investments within shipping, offshore, renewable energy and cruise. Bonheur consolidated IBD amounts to NOK ~14bn, but only NOK 3.1bn is recourse to parent. Bonheur has NOK 3.3bn of cash vs. NOK 2.4m of bonds. In addition the company has sidelined another NOK 2.2m of cash in 100% owned entities that management noted will be streamed up to parent. Hence, we view asset backing in bonds to be sufficient.
15 Genel Energy Finance 2 2014(17/22)	NO0010710882	103,53	8,9 %	2,4 %	Genel Energy is an independent E&P company with assets in Kurdistan, where it has been active since 2002. The company has 150 mboe of 2P oil reserves and 2.6bn boe of 2C gas resources. Genel is listed in London with a market cap of GBP 620m and Q3'18 net production of 34,000 bopd. By end-January'19, the company had USD 360m of cash held in UK banks vs. Bond at USD 300m. Furthermore the Company guides for an free cash flow of more than USD 100m at a Brent oil price of USD 45/bbl for FY/19. If we assume that the oil price hold USD 65/bbl through the year on average this FCF figure would potentially grow to USD 200m. As we view it, the current loan agreement limits potential dividends which is considered credit positive given the already strong cash position and FCF generation.
16 Okea AS 17-20	NO0010810062	103,50	7,1 %	2,3 %	Okea is an independent E&P company focused on small field developments on the NCS. Okea recently acquired Shell Norway's 44% interest in Draugen and 12% interest in Gjøa for NOK 4.5bn. The recent acquisition increased Okea's asset base substantially. The bond is secured and offers significant asset backing for bondholders.
17 Noram Drilling Company AS 14-19	NO0010711948	99,87	9,3 %	2,3 %	Noram Drilling is an onshore drilling company owning nine drilling rigs, all of which operate in the Permian Basin. The largest shareholder is John Fredriksen's Geveran, owning 58%. We view Noram as a solid credit due to its strong cash flow, solid asset backing which in its turn reduces the refinancing risk, positive market outlook and a strong and industrial owner.
18 Western Bulk Chartering AS 13-19 FRN	NO0010675572	102,09	7,1 %	2,1 %	Western Bulk Chartering is a global dry bulk operator with a trading oriented business model, focusing on the Supramax and large Handysize segment. The Company is listed on the Norwegian OTC list and is 74% owned by Kistefos. We view the credit as strong with limited refinancing risk due to i) strong support from main shareholders whom has contributed with NOK ~350m of equity since 2016, ii) strong balance sheet with a net cash position and iii) improving market fundamentals.
19 Frigaard Property Group AS 18/21	NO0010826092	98,50	8,5 %	2,0 %	Norwegian based construction company with operations mainly in South-East of Norway. The bond is secured and leverage is deemed conservative with a NIBD/EBITDA'18 estimated to be ~1.5x. The credit case further benefits from relatively strong earnings visibility.
20 REC Silicon ASA DL-Bonds 2018(18/23)	NO0010820590	100,50	11,7 %	1,9 %	REC Silicon is a Norwegian solar company listed on the Oslo Stock Exchange with a market cap of NOK 1.7bn. The company is currently affected negatively by the ongoing trade-war. The bond is secured in the Butte plant which is producing some USD 40m of run-rate EBITDA. Hence, implied bond valuation currently stands at 2.75x.
