COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund was down 0.4% in February and is up 0.3% YTD (institutional IC NOK share class: LU0840158496).

In February, financial markets experienced one of its worst months in years as cases of coronavirus infections increased outside of China. U.S and European equity markets measured by the S&P 500 and MSCI Europe sold off 8.4% and 8.7% respectively. In the global credit markets, the flight to safe haven fixed income assets continued with U.S treasuries and U.S investment grade gaining 2.65% and 1.35% vs. U.S and European high yield which declined by 1.4% and 2.05% respectively. The long-term interest rates in most western markets are now at or close to all time low creating less opportunities going forward in longer dated bonds. Oil prices remained under pressure on the back of demand worries combined with fears of Russia and OPEC not agreeing on further supply cuts which resulted in WTI and Brent prices declining by approx. 13% and 11% respectively during February. As a result, The Philadelphia Oil Service Index lost 17% and the US Energy high yield index lost 7.2% during the month.

In the Nordic high yield market credit spreads widened and primary market activity slowed down due to the increased market turmoil. As expressed in previous monthly letters we have constructed and positioned our portfolio for adverse market conditions with short maturity bonds, increased credit quality and a higher cash position. During the month we increased our position in AKERBP (S&P: BBB-, NOK 80bn mcap) at nearly 5% yield to maturity in 2022. The credit benefits from having a solid balance sheet (debt/EV of ~30%), strong cash flow from high quality assets and very comfortable debt service capacity. Furthermore, our holding in DNB's AT1 (S&P: BBB) was called during the month and replaced with a short duration position in Storebrand Livforsikring (S&P: BBB).

The outcome and the potential impact on the world economy as a result of the coronavirus is difficult to estimate and quantify. On the other hand, it is encouraging to see that central banks stimulating the economy with countries such as the U.S and Canada cutting interest rates by 50bps. Furthermore, the Chinese government is taking action and is fuelling the economy with large investments in infrastructure. If that materialises it will have a significant impact on several shipping segments transporting raw materials to China.

We expect the markets to remain volatile going forward and we continue to stay faithful to our strategy by remaining conservative and protecting capital by being exposed to a diversified portfolio of solid Nordic high yield bonds with shorter credit duration (2.2 years), lower modified duration (1.1 years) and uncorrelated to that of European and US High Yield markets. This in combination with having access to liquidity through a solid cash position (7%). The yield to maturity in the portfolio is 7.6% in NOK (including cash).
