COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund posted a positive return of 0.2% in June and is up 4.6% YTD (institutional IC NOK share class: LU0840158496).

In June, global markets moved higher as investor concerns regarding an economic slowdown lessened supported by better economic data and inflation levels that moderated in line with expectations. Risk asset measured by the S&P 500, Nasdaq and Stoxx 600 returned +6.5%, +6.6% and +2.25%. While the Federal Reserve paused its interest hikes, it continued to convey its position that further actions are required to meet the inflation target. US 10-year rates increased from 3.68% to 3.86%, while European rates remained relatively flat during the month. In the corporate bond market, US and European investment grade bonds declined on the back of higher market rates, while their respective high yield markets returned +1.65% and 0.45% supported by tighter credit spreads.

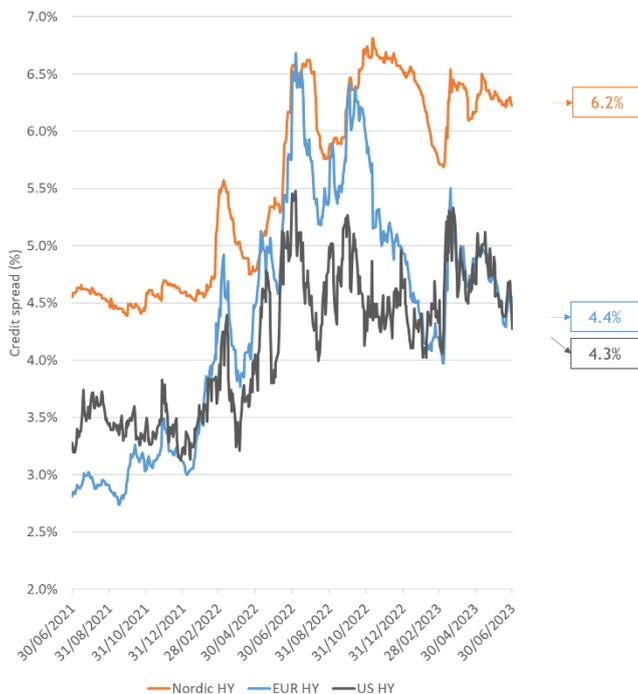

Credit spreads in the Nordic high yield market remained unchanged in June and the fund's performance was primarily driven by the coupon carry. However, this was to some extent negatively impacted by our exposure in energy services. During the month - our energy services company DOF carried out an IPO at Oslo Stock Exchange. Due to somewhat challenging market conditions within the energy services space, the company priced within the lower range. This in turn resulted in the largest family office in the Nordics (Fredriksen Family) acquiring 5% of the company. Shortly after the placement, the company received an offer for 100% of the outstanding share capital from Subsea 7 - substantially above the IPO price. However, the company declined the offer - as they believe the offer price is substantially below DOF's intrinsic value. We echo this view and expect DOF to reprice towards peers on the back of strong Subsea market fundamentals coupled with an industry leading backlog ensuring robust cash flows for the foreseeable future.

During the month we sold our secured bonds in Tidewater maturing in 2026 at 102.75 corresponding to a credit spread of ~300bps and participated in Tidewater’s new USD 250m 5-year unsecured bond issued at a yield of 10.575%. The Company is the world’s largest offshore supply owner with a market capitalization of USD 2.7bn. The credit is backed by a strong balance sheet with an LTV of ~20%, solid cash flow generation and a restrictive bond structure improving the asset coverage through the lifetime of the bond and incentivizing the company to make early above-par redemption. We participated in Foxway’s EUR 200m 5-year secured bond at STIBOR + 700bps. Foxway is a leading provider of circular IT solutions. The offering includes sourcing the IT equipment to recollection, refurbishment, and recycling. The company, which is majority owned by Nordic Capital, was established in 2009 and has a global footprint being active in more than 120 countries. The credit benefits from having a strong 1st lien bond structure, attractive implied valuation, solid underlying market growth supported by increased regulatory push for circular IT solutions, strong ESG-profile and a solid sponsor in Nordic Capital which has contributed with a substantial equity contribution. Furthermore, Ocean Yield and Rederi Eckerö bought back our bonds at 105.125% and 105.5% and hence the exposure left our portfolio during the month.

The yield level in the portfolio is currently at 8.5% in NOK (including ~10% in cash), indicating an attractive spread premium between Nordic HY and international HY markets of nearly ~200 bps (illustrated in bottom left chart). We continue with our fundamental and selective approach targeting companies with strong debt service capacity and sensible capital structures. We have high-graded the portfolio substantially during the last 9-months and we deem that the credit quality in the portfolio is robust and resilient. This is illustrated by our portfolio holdings having a weighted leverage level and interest coverage ratio of ~3.8x (similar to US BB-) and ~5.7x (similar to US BBB+). We therefore believe that the current risk/reward is compelling and more than compensating us for recession risks in today’s environment. The credit and modified duration are currently at 2.1 years and 0.9 years, respectively, which gives less sensitivity to changes in credit spreads and interest rates. Central to our risk management approach is also a robust liquidity buffer which enables us to manage through unforeseen volatility and continue to act on attractive investment opportunities.

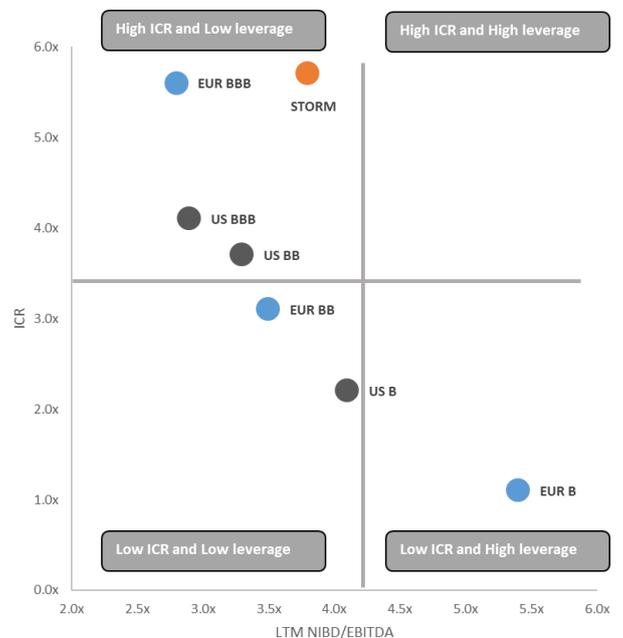

On the operational side we are happy to announce that the Financial Authority in Luxembourg (CSSF) approved the re-classification of the funds ESG methodology and framework from an article 6 to an article 8 under SFDR. A required pre-notification has been sent out from our administrator and the reclassification will be effective as of 26th July 2023. As such - your custodian might already have sent out information about the prospectus change to reflect the above, which was required by the regulator to have this upgrade to article 8. As this ESG methodology and framework already has been well integrated into our investment process for a long time it will not change the management style of the fund.

BOND PORTFOLIO - TOP 20

NAME	ISIN	PRICE	YIELD %	NAV %	SHORT DESCRIPTION
1 American Tanker Inc. 20-25	NO0010886328	97.1	9.0%	2.6%	American Shipping company owns 10x modern US Jones Act Tankers. The Company is listed on the Oslo Stock Exchange with an mcap of -NOK 2.9bn. All vessels chartered out on bareboat contracts. Estimated EBITDA backlog covers majority of net debt. Strong financial sponsor in Aker ASA.
2 Odfjell Drilling 23-28	NO0012921172	100.8	8.5%	2.4%	Odfjell Drilling is a leading provider of energy services in the North Sea and is listed on Oslo Stock Exchange with a mcap of -NOK 6.3bn. The credit benefit from a strong collateral package comprised of two high spec rigs under long term contracts with Equinor. Further, the current EBITDA backlog of the collateral rigs covers the bond by more than 100%, resulting in strong cash flow visibility and debt service capabilities. We estimate 60% LTV at issuance, which will decline towards 35% at maturity through scheduled amortization. This combined with a strong ownership base, long track-record, ESG focus and strong outlook, is deemed to make the credit story attractive.
3 Stena Ab 14-24	USW8758PAK22	99.9	5.9%	2.2%	Swedish conglomerate which is 100% controlled by Sten Olsson family. Stena key operations are diversified and involve ferries, shipping, real estate, drilling and private equity investments. The credit profile is supported by moderate leverage, solid cash conversion and a leading market position. In addition it has solid financial sponsors in Triton and Mr. Erik Must.
13 International Petroleum Corp 22-27	NO0012423476	94.0	8.9%	1.7%	International Petroleum Corporation (IPC) is an international energy company with a portfolio of production assets. The company is listed in Sweden with a market cap. of -SEK 12bn. IPC is part of the Lundin Group of companies and the Lundin Family and management owns in excess of 30%. The bond is officially rated a B+ by S&P. The credit benefits from modest leverage levels, strong asset backing and free cash flow generation.
14 INTRUM AB 22-28	XS2566291865	85.5	14.3%	1.7%	Intrum is a leading European debt collector listed in Stockholm with a market cap of -SEK 9bn. We deem the bond attractive due to i) all-time high cost of capital for Intrum, ii) similar spreads as lower quality debt collector's vs Intrum historically trading at steep discount in yields and iii) strong commentary from management that their key goal is to reduce leverage. Intrum LTM cash EBITDA sits at SEK 13.2bn, corresponding to -4x leverage and -6x ICR, while management targets to reach 3.5x leverage as soon as practically possible. On cash flow, Intrum recurring LTM cash flow sits close to USD 10bn, which further illustrates robust debt servicing capacity.

The AT1 bonds are subordinated with call date on November 11th, 2024. We see limited call risk on the back of the strong balance sheet, robust underlying profitability, and a well-diversified lending book.
17 Ellos Group AB 19-24	SE0012827996	78.1	30.0%	1.5%	Ellos Group is a Swedish e-commerce company. The bond structure is ring-fenced with no leakage. The credit story is deemed to be attractive due to the company's solid market position, strong cash generation, sound LTV levels and tight bond structure.
18 Sanoma Oyj 23-26	FI4000549563	101.8	12.6%	1.5%	Sanoma is Finland's #1 media corporation and the leading European supplier of K12 learning services. The company is listed on the Helsinki stock exchange with a market cap of -EUR 1.2bn. The hybrid notes carry a coupon of 8% and has a coupon step-up of 5% if not called. The credit is backed by its leading market position in Finland and Europe, solid cash conversion and moderate leverage metrics of 3.2x.
19 Navigator Holdings Ltd. 20-25	NO0010891955	99.7	7.7%	1.5%	Navigator owns and operates the world's largest fleet of handysize gas carriers with a market cap of -USD 1bn. The fleet was recently expanded through the merger with Ultragas back in 2021 and the fleet is now comprised of 56 ships. The company plays a vital part in the liquefied gas supply chain. The credit benefits from having strong credit metrics, significant debt service capacity and robust underlying market fundamentals.
