COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund posted a positive return of 0.6% in February and is up 1.6% YTD (institutional IC NOK share class: LU0840158496).

The positive market sentiment continued through February. Equities rallied although markets priced away half of the rate cuts priced in at the start of the year. US stocks saw significant gains, with Nasdaq and S&P increasing by +6.1% and +5.2%, while European equities had more subdued returns, with Stoxx 600 up +1.8. Credit spreads narrowed across the board, with US HY spreads decreasing by 32bps to ~310bps and EUR HY by 30bps to ~340bps. The tighter spreads more than compensated for higher interest rates, yielding returns of +0.3% for US HY and +0.4% for EUR HY. On a total return basis, HY outperformed IG by 130-180bps for the month. Long term interest rates rose broadly, with US 10Y increasing by some 35bps to 4.25% and the Eurozone by about 25bps to 2.41%.

The Nordic HY market reported another set of robust returns, with the Storm Bond Fund generating +0.6%. This performance was primarily driven by coupon carry and some spread tightening.

In February, Cegal refinanced its bond maturing in December 2024 with a new 3-year senior secured NOK 1.55 billion bond at N+500bps. Cegal is a technology company providing cloud solutions, software, and consultancy services. The company is a frequent bond issuer, and we have been invested since their inaugural bond back in 2016. Since then, the company has grown organically and merged with Sysco, creating a leading market position. The bonds are secured, providing bondholders with significant asset backing through their attractive implied valuation. Furthermore, the company demonstrates solid cash conversion, leading to a strong debt service capacity. We rolled most of our exposure in the new bond.

Additionally, we increased our exposure to B2 Impact through a EUR 50m tap issue on the 2028 bond (EURIBOR+500bps). Furthermore, we sold our exposure in Altera Shuttle Tankers back to the company as part of their refinancing. We opted not to participate in the new 9.00% USD 200m bond offering, believing that the bond spread (+475bps) does not adequately compensate for the underlying market risk, elevated leverage, and high LTV.

In the secondary market, we built a sizeable position in Nes Firecroft secured USD 300m bond at attractive levels. The bond matures in 2026 and carries a yield to maturity of 9.1% and 11.0% to next call. Nes Firecroft is a global workforce provider specializing in engineering staffing and solution provider for highly technical industries. The credit case is supported by 1) robust balance sheet with leverage now at ~2.5x, 2) modest LTV at ~50%, 3) robust cash flow generation and 4) the net working capital position adds a large cushion for bonds.

We continue with our fundamental credit selection approach targeting issuers with attractive implied valuations, sound balance sheets and solid interest coverage ratios. As a result, we have consistently high graded the portfolio, ensuring it's well diversified across industries with quality Nordic issuers that are resilient to shifts in inflation and interest rate expectations. The current yield in the portfolio stands at 8.0% in NOK (incl. 8% cash), and we consider the risk/reward to be attractive, given that the portfolio's weighted average credit metrics align with BB/BBB credits. This, coupled with maintaining a prudent cash position between 5-10%, enables us to navigate unforeseen volatility and act on attractive investment opportunities. Furthermore, Nordic HY currently offers a spread premium of more than 200 bps compared to US/European high yield.
