COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund posted a positive return of 0.7% in December and is up 8.4% in 2024 (institutional IC NOK share class: LU0840158496).

The year 2024 marked another robust period for risk asset and high yield bonds. Like 2023, large cap tech stocks were the big winner, while HY credit outperformed IG by a wide margin. Market sentiment in December softened following November's strong gains, resulting in mixed performance across risk assets. The Nasdaq rose +0.5%, while the S&P 500 and Stoxx 600 fell -2.5% and -0.5%, respectively. In fixed income, long-end yields moved higher across the board in December. The US 10-year Treasury yield increased by 40bps to 4.57%, and the 10-year Bund yield rose by 29bps to 2.36%. Both the FED and ECB cut interest rates by 25bps during December. Looking ahead, the market prices in approximately one rate cut from the FED and four cuts from the ECB in 2025. Credit spreads were mixed in December, with US HY spreads widening some 20bps to ~290bps, while EUR HY spreads tightened some 20bps to ~310bps. On a total return basis, US HY fell -0.4% and EUR HY gained +0.6%.

In December, the Nordic High Yield market delivered another strong month and the fund's performance came in at +0.7%, largely driven by its attractive coupon carry. Primary activity in the Nordic HY market was robust, with NOK 14bn in HY transactions priced in December. Total deal volume for 2024 came in at NOK 223bn surpassing the previous high of NOK 193bn in 2021. Looking into 2025, we anticipate continued high primary activity.

During the month, we participated in two primary deals related to shipping services/logistics. Firstly, we took a position in Wrist Supply Services inaugural EUR 200m Sr. secured bond. The bond was priced at EURIBOR +500bps and matures in 2029. Wrist Supply Services is based in Denmark and is the clear market leader in marine supply and logistics. We deem the bond attractive due to 1) stable and resilient earnings profile, 2) strong market position and 3) sensible capital structure with robust cash flow. Secondly, we participated in Macgregor’s inaugural EUR 175m 5Y Sr. secured bond, which was priced at EURIBOR +525bps. The bond was raised in connection with Triton’s acquisition of Macgregor from the Finnish industrials group Cargotec Oyj. Macgregor is the global market leader in maritime cargo and load handling solutions. The bond is supported by 1) robust revenue visibility through EUR 1bn backlog, 2) improving financials driven by an exit from offshore wind and 3) low leverage and modest LTV.

In the secondary market, we increased our position in SFL (3.25% of NAV) and Tidewater (1.85% of NAV), reflecting our conviction in these positions.

As we embark on the 17th consecutive year for Storm Bond Fund, we argue that the portfolio is strong and well positioned to deliver attractive returns. Over the last year, we have consistently high graded the portfolio, ensuring that it’s well diversified across industries with quality Nordic issuers. We deem the current yield of 7.5% (incl. 8% cash) attractive, considering that the portfolio weighted avg. credit metrics align with BB/BBB credits, while at the same time offering a higher spread vs International B’s.

Underpinned by our fundamental and selective credit research approach, Storm Bond Fund has achieved an annualized three-year return of +8.6%, outperforming US and European HY by +22% and +19%, respectively. The outperformance has been accomplished with minimal volatility of 1.6%, a mere fifth of the volatility in these other markets. This performance stands as a testament that our investment approach has proven to deliver solid risk-adjusted returns, resilient to shifts in inflation and interest rate expectations.

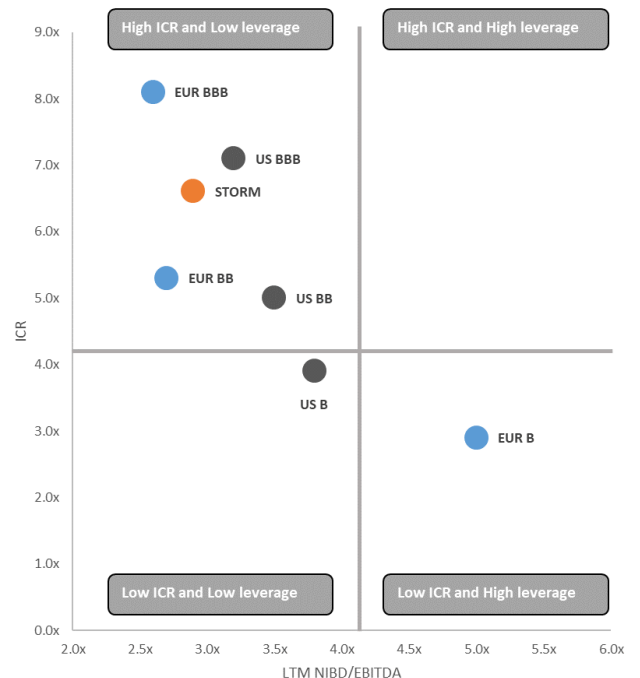

After a robust 2024, we see the fund attractively positioned for 2025. Our portfolio is constructed with low credit and modified duration, providing resilience to both spread and interest rate fluctuations. Complementing this, our robust risk management approach and liquidity buffer will enable us to capitalize on market opportunities.
