COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund posted a negative return of -0.2% in April and is up 1.5% YTD (institutional IC NOK share class: LU0840158496).

April saw significant volatility due to Donald Trump's "Liberation Day" announcement on April 2nd. At the intra-month lows, the S&P 500 was down by over 11% and US HY credit spreads widened by more than 100bps. Sentiment improved with the 90-day tariff pause announced on 9th April, allowing equities and corporate bonds to recover. Risk assets measured by Nasdaq, S&P 500 and Stoxx 600 returned +0.9%, -0.8% and -1.2%, respectively. Long-term interest rates fell by 4bps in the US and 30bps in Europe. US high yield spreads widened by 37bps to ~385bps and European HY spreads widened by 25bps to ~360bps. On a total return basis, US HY remained flat, whereas European HY gained +0.3%.

The Nordic high yield market quickly reflected the global uncertainty caused by the US administration proposed tariffs. As in international markets, the Nordic HY market saw a sharp decline in cash prices and wider credit spreads post "Liberation Day". Subsequently, bonds began to recover after the announced tariff pause.

Our defensive positioning and focus on capital preservation led to a 1.1% outperformance compared to the Nordic HY market. Additionally, Storm Bond Fund delivered 30-day volatility of 2.9%, almost 50% less volatility than the broader Nordic market.

During the month, we were particularly active in the secondary market and utilized market volatility to buy bonds at attractive levels. We acquired Grieg Seafood’s perpetual bonds at levels between 93.5 and 94.5, subsequently selling them close to 99 cents. The bonds were issued at PAR in late February this year. Additionally, we added high quality bonds in companies such TDW, Euronav, Scatec and Bewi. These transactions were made at five to seven bond points below pre-liberation day levels and have since seen a substantial price recovery. Finally, we participate in TDC Net (BBB-) EUR 500m 7-year primary bond offering at 99.27 (+285bps), which we later sold at 100.51 in the secondary market.

Our investment strategy remains focused on maintaining a well-diversified, conviction-based portfolio of high-quality Nordic issuers, underpinned by a robust risk management framework. As a result, we have proactively high-graded the portfolio in recent years - currently composed of issuers with robust asset backing, strong balance sheets, and solid debt service capacity.

The current yield in the portfolio stands at 7.8% in NOK, including 10% in cash, and we view the risk/reward profile as attractive, with weighted average credit metrics comparable to BB/BBB credits. In addition, and central to our strategy, we continue to maintain a prudent cash position of 5-10% - allowing us to manage unforeseen volatility and capitalize on attractive investment opportunities. This disciplined approach has contributed to our outperformance relative to the broader market this month, as well as during 2022 – and we remain confident in its ability to continue generating attractive risk-adjusted returns.
