## COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm bond fund posted a positive return of +0.2% in March and is up +1.8% YTD (institutional IC NOK share class: LU0840158496).

Risk sentiment deteriorated in March as the war in the Middle East drove a sharp rise in energy prices, lifting inflation expectations and interest rates. The Nasdaq and S&P fell -4.8% and -5.1%, while European equities underperformed with Stoxx 600 declining -8.0%. Long term interest rates moved materially higher across the board: US 10Y Treasury yields increased by +38bps to 4.32% and German 10Y Bund yields advanced +36bps to 3.00%, a new five year high. By end of month, markets priced ECB to hike three times this year. In credit markets, US HY spreads widened by +26bps to 317bps and European HY spreads increased by +53bps to 332bps. Total returns were negative, with US and European HY down -1.2% and -2.5%, respectively.

The Nordic HY market reflected the movements seen in markets abroad. Despite the backdrop, Storm Bond Fund delivered resilient performance, returning +0.2%. Performance was supported by our defensive positioning, low duration, and favorable sector allocation.

With a moderate spread widening and increased volatility we added higher quality HY bonds with moderate duration at attractive entry points to our portfolio. Key additions to the portfolio during this period included CMB Tech 2026, BW Offshore 2028, Odfjell Technology 2028, Constellation 2029, Enquest 2027, and BlueNord 2029. Our bond exposure in Wallenius Wilhelmsen and YIT 2026 matured and Aker Biomarine ASA was called early during the month.

March provided a clear demonstration of the strength of our investment approach, as the portfolio showed resilience in a more challenging market environment. This reflects our consistent focus on high-quality Nordic issuers with strong asset backing, robust balance sheets, and proven debt-servicing capacity - forming a portfolio designed to perform across market cycles.

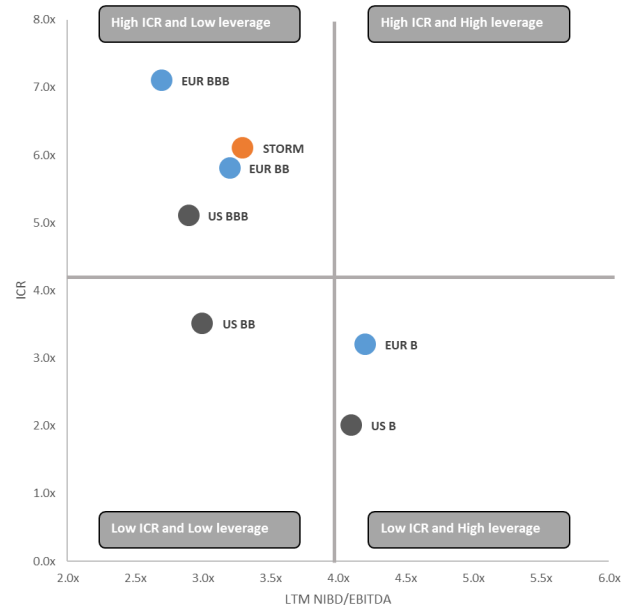

With a 7.5% yield in NOK, low duration (2.2 years credit duration; 0.9 years modified duration), and BB/BBB-equivalent credit quality, the portfolio offers an attractive combination of income and capital preservation. Our active risk management, including a 5-10% cash buffer, further enhances flexibility - allowing us not only to protect capital in periods of volatility, but also to proactively capture opportunities as they emerge. We believe this positions the strategy as a compelling option for investors seeking stable, risk-adjusted returns in today's environment.

## BOND PORTFOLIO - TOP 20

NAME	ISIN	PRICE	YIELD %	NAV %	SHORT DESCRIPTION
Hofseth International AS 25-30	NO0013684993	95.6	11.3%	2.5%	Hofseth International is a leading seafood company, established in 2002, with a fully integrated value chain spanning farming, processing, and global distribution of Atlantic salmon and trout. Current harvest volumes stand at 16k tons with 50k ton of processing volumes. Our investment thesis is supported by 1) a 1L structure ranking pari-passu with bank, 2) modest LTV of ~50%, 3) high quality and tangible asset base, 4) meaningful barriers to entry and 5) a clear roadmap for organic production growth and deleveraging through existing licenses.
Nynas AB 25-28	NO0013409847	106.1	10.3%	2.1%	Nynas is a Swedish specialty chemicals company and Europe's leading producer of naphthenic specialty products (NSP) and Bitumen. With over 90 years of operational history, Nynas is the only domestic NSP supplier in the region. Its products typically account for just 3-7% of customers' total costs, making quality and reliability more critical than price – resulting in high customer stickiness and strong margins. The bond is secured, and with leverage expected to decline, we view the risk/reward profile as compelling.
EnQuest PLC 22-27	USG315APAG37	102.2	10.8%	2.0%	EnQuest, a UK-listed energy company with a market cap of USD ~500 million, specializes in production from mature fields in the North Sea. The company benefits from high-cost flexibility, driven by its control of ~80% of its produced barrels. EnQuest's credit profile is supported by low leverage, robust debt service capacity, strong FCF generation and deleveraging capabilities. Additionally, its carry-forward tax losses mitigate the impact of windfall taxes, positioning the company advantageously for accretive M&A opportunities on the UK continental shelf.
Shearwater GeoServices AS 24-29	NO0013182766	86.0	16.8%	1.9%	Shearwater is a global provider of marine geophysical services. The company owns and operates a fleet of 23 vessels making them the largest seismic operator in the world. We deem the credit story attractive due to 1) strong cash flow generation, 2) well capitalized balance sheet and 3) strong market position in a consolidated seismic vessel market.
International Petroleum Corp 25-30	NO0013671107	101.5	7.9%	1.8%	International Petroleum Corporation (IPC) is an international energy company with a portfolio of production assets. The credit benefits from the company's strong market position paired with solid free cash flow visibility and low loan-to-value in an improving market.
Tieto Tech Services 25-31	NO0013631739	103.6	10.0%	1.2%	Vivicta (previously Tietoevery Tech Services) is a leading Nordic IT service carve-out from Tietoevry. The EUR 225m 6Y senior secured bonds were issued at +650bps with strong bond support from low operating leverage (1.6x), robust FCF generation (10% FCF/GIBD 2026e), and strict documentation. Despite sector softness and carve-out risks, downside is protected by a conservative SOTP LTV of ~40-50% based on a heavily discounted peer valuation. Further, there is upside to valuation if the carve-out unlocks value through operational focus and multiple re-rating.
Tullow Oil 21-26	USG91237AB60	94.9	20.1%	1.2%	Tullow Oil (founded in 1985) is an independent energy producer. The company operates a 12-vessel fleet, including two high-specification newbuilds. Our positive credit view, on an instrument with approximately 3.5 years of remaining tenor, is underpinned by a robust security package offering high collateral coverage and strong revenue visibility. This visibility is supported by a contracted backlog with top-tier counterparties, materially de-risking debt service through maturity. In addition, the liquid nature of the underlying asset base provides a substantial margin of safety for the investment.
